

## Decision Processes Colloquium

October 4, 2010

### **Karim Kassam**

Assistant Professor of Social and Decision Sciences  
Carnegie Mellon University

#### **“Understanding Facial Expressions”**

Facial expressions have been studied for decades but their relationship with emotion, among other variables, is far from well understood. I examine the connections between self-reports, facial expressions, and emotion-evoking stimuli in order to understand the relationship between felt emotion and facial expression.
